AAMVA

Booth: 527

Contact: Eric Dunn

Website: aamva.org

Founded in 1933, AAMVA serves North American motor vehicle and law enforcement agencies to accomplish their missions. The association's vision-Safe Drivers, Safe Vehicles, Secure Identities, Saving Lives-guides AAMVA's activities, resources, and programs in driver licensing, vehicle titling/registration, motor carrier services, identity management, and technology solutions.

ACTS

Booth: 621

Contact: Carol Kidd

Website: www.autoalliance.org

The Driver Alcohol Detection System for Safety (DADSS) Research Program brings together the Automotive Coalition for Traffic Safety (ACTS), which represents the world's leading automakers, and the U.S. Department of Transportation's National Highway Traffic Safety Administration (NHTSA) in one of the most important government and private sector partnerships in recent years. Congress and safety proponents nationwide are supporting the effort, making DADSS part of a multi-faceted national commitment to mitigate the frequency and consequences of drunk driving. Despite progress over the past three decades, drunk driving claims approximately 10,000 lives each year. The DADSS Program is researching a first-of-its-kind technology that holds significant potential to reverse this trend. As conceived, the technology will automatically detect when a driver is intoxicated with a blood alcohol concentration (BAC) at or above 0.08 – the legal limit in all 50 states – and prevent the car from moving. If commercialized, DADSS will be made available as a safety option in new vehicles – like automatic braking, lane departure warning and other advanced driver assist vehicle technologies.

ADEPT Driver

Booth: 215

Contact: Richard Harkness, Ed.D.

Website: www.adeptdriver.com

Advanced Drivers Education Products & Training, Inc. (ADEPT Driver) is a science-based instructional technology company that designs behavioral interventions that measurably reduce automobile crashes. ADEPT Driver is recognized by the insurance industry as the leader in crash reduction training. Our teenSMART® program is approved by most state Departments of Insurance due to its proven effectiveness. Our Lifelong Driver® program extends the driving lifecycle of older drivers.

Alere Toxicology

Our product employs the latest in Electric Muscle Stimulation technology. With a fully rechargeable lithium battery, our devices are portable and easy to use.

American Traffic Safety Services Foundation

Booth: 536

Contact: Lori Diaz

Website: www.atssa.com/TheFoundation

The American Traffic Safety Services Foundation (The Foundation) exists to promote roadway safety through charitable giving and public awareness programs like the National Work Zone Memorial, the Roadway Worker Memorial Scholarship, and the Experience Camps Travel Scholarship.

ATA Share the Road

Booth: 224

Contact: Don Biggerstaff

Website: www.atastr.org

Share the Road is the premier highway safety education program of the American Trucking Associations. For the past 25 years, million-mile accident free, professional truck drivers have delivered specific life-saving safety tips to the public, the media and public officials by way of television, radio, the web and in print. The Share the Road program also orchestrates blind spot demonstrations with a Share the Road wrapped tractor trailer to demonstrate how to drive safely around large trucks on the nation's highways.

B.R.A.K.E.S.

Booth: 614

Contact: Mimi Sabates

Website: www.PutOnTheBRAKES.org

B.R.A.K.E.S. is a free hands-on defensive driving program. The curriculum includes an array of defensive driving techniques, including crash avoidance, distracted driving, drop wheel/off road recovery, panic stops as well as car control and recovery. By training and educating teenage drivers and their parents, the program aims to promote safe driving in an attempt to prevent injuries and save lives. Since its inception in 2008, B.R.A.K.E.S. has expanded from operating schools only in Charlotte, North Carolina, to hosting schools in more than 18 states. B.R.A.K.E.S. has provided training for over 22,000 teens.

Baby Trend

Booth: 528

Contact: Teresa Holland

Website: www.babytrend.com

Baby Trend has distinguished itself among the worldwide leading manufacturers of juvenile products. Throughout the 26-year history of our company, we have been on the forefront of new and innovative solutions that meet the ever increasing demands of new parents.

Below 100

Booth: 231

Contact: Dale Stockton

Website: www.Below100.org

Below 100 is a non-profit program that delivers police officer safety training across the country. Below 100 targets areas under an officer's control that have been shown to be responsible for thousands of deaths and serious injuries. The name of the program reflects the goal of driving drive down line-of-duty police deaths to fewer than 100 per year, a level not seen since 1943. The trainers are veteran police officers who volunteer their time. Below 100 has been widely recognized as the most successful officer safety program in the history of law enforcement.

Britax Child Safety, Inc

Booth: 300

Contact: Sarah Tilton

Website: www.us.britax.com

At Britax, we believe family life should be lived without limit. A world where parents and children are free to make the most of every moment together. And we think it's our responsibility to make this happen. By driving safety standards to ensure children have never been better protected on the move. By pushing boundaries in smart design to make life in motion run smoothly. By extending a helping hand - or two - and always celebrating the journey. We've been leading the way in child safety technology for more than 70 years. Always innovating, always focusing on what's best for the child, always going beyond 'good enough.' From Europe's best-selling car seat brand, we've become one of the brands most trusted by American families since we launched here in 1996. Since then, we've revolutionized side impact protection, transformed safe seat installation, and introduced a range of smart strollers designed around the changing needs of today's families.

Website: thinbluereports.com

Thin Blue Line Reporting is a mobile reporting solution that harnesses consumer grade ease of use with the rigors and unique workflow requirements demanded by the law enforcement community. The iOS based front line tool enables officers to create eCitations and other reports using a ruggedized iPhone or iPad. The robust, module based system enables officers to create reports in a fraction of the time when compared to

ThinkFirst National Injury Prevention Foundation

Booth: 236

Contact: Debby Gerhardstein

Website: www.thinkfirst.org

ThinkFirst's medically-based chapters use a science-based, informative approach to teaching injury prevention. Injury prevention educators provide dynamic presentations that help students understand the power – and fragility – of the brain and spinal cord. Students learn that making simple, yet responsible choices can greatly reduce their risk for injury. Presentations on vehicle, sports and recreational safety; concussion awareness; falls prevention for older adults; baby safety for new parents. Apply, schedule online training, and begin promoting a culture of safety with these complete programs.

TjohnE's ThinkFast Interactive

Booth: 338

Contact: Tim John

Website: ThinkFastInteractive.com

ThinkFast Interactive is an evidence based prevention intervention. Our teen driver awareness program integrates innovative evidence-based instructional technologies, and uses the latest understandings in neuroscience to guide our instructional technology. Teens and adults everywhere love this program, and our evaluation data empirically documents that ThinkFast Interactive is effective with all types of teens, and consistently measured improvements in critical factors that lead to real world driving behavior change. Governors Highway Safety Offices agree our methods work!

UPPAbaby

Booth: 409

Contact: Daniella Brown

Website: www.uppababy.com

UPPAbaby draws on a decade of experience in the juvenile industry and on our own inspirations as parents of young children. We look for ways to make our baby products lighter, more savvy, easier-to-use, even fun. We explore ways to deliver greater comfort and safety for baby, with convenience and style for Mom and Dad. We even challenge the homogenous look of most baby products, by creating sleek designs and more sophisticated, modern fashions. UPPAbaby strives to deliver the personal attention and customer service that you expect and deserve.

US DOT-Transportation Safety Institute

Booth: 712

Contact: Christine Lawrence

Website: www.tsi.dot.gov

The Transportation Safety Institute (TSI), a fee-for service organization that operates without a direct appropriation, supports the U.S. Department of Transportation's goal to reduce transportation-related deaths and injuries through quality instruction to those entrusted with enforcement and committed to compliance. For 40 years, TSI has provided training to Federal, State, and local governmental, private sector, and foreign transportation professionals on a cost-recovery basis.

Virginia Tech Transportation Institute

Booth: 620

Contact: Pam Stiff

Website: www.vtti.vt.edu

VTTI is forging a safer transportation system by leading naturalistic studies that deliver real-world driving data, many of which are now featured in the first driving guide of its kind: "Survive the Drive." Developed and written for all road users, "Survive the Drive" is filled with personal anecdotes, facts, figures, and new and informative results from the largest naturalistic driving study ever performed.
