2018 Lifesavers Conference: Real World Solutions for Older Drivers

Older Driver Resource List

Community Group Presentations

A Safe Drive Through the Aging Process: This 1-hour presentation is developed to empower older drivers to make appropriate decisions on the future of their driving career.

Adults with Aging Parent Drivers: A 1-hour group presentation developed to help families when they become concerned about a loved-one's ability to drive safely as a result of the natural aging process. We provide participants with a roadmap to help families address the issue with tact, compassion, and empathy, so that the older driver's dignity is never unnecessarily jeopardized.

Continuing Education (CEU) Programs for Professionals

1) “Bringing a Peaceful Resolve to Complex & Sensitive Senior Driving Issues”
2) “Driving Under the Influence of Dementia®”

Enhanced Self-Assessment Program

Our individualized program is designed to serve as a valuable tool in helping older drivers (and their families) make appropriate decisions regarding the future of one’s safe driving career. If the individual is a safe driver, we provide him or her with strategies on how to remain a safe driver as they progress through the aging process. If driving retirement is the appropriate decision, then we provide the individual (and their family) with acceptable alternatives, resources and a very specific plan to ensure a smooth and successful transition from the driver’s seat to the passenger seat.

Family Empowerment Session

This session is ideal for families that believe they can handle this very delicate, sensitive and sometimes emotional issue with their loved one on their own, but would appreciate direction, guidance, support and encouragement on how to handle the discussion with a loved-one.

“Beyond Driving with Dignity; The workbook for older drivers and their families”

Working through this instrument will help families make driving-related decisions that are not only in the best interest of the older driver, but simultaneously find themselves in the best interest of highway safety in general. This workbook was designed to be used in the confidence and comfort of the family’s own home, most likely at the kitchen table.
