LOUISVILLE PEDESTRIAN SAFETY AND WALKABILITY INITIATIVES
Evaluation: Pedestrian Master Plan

Vision:
For Louisville to become the safest and most appealing community for pedestrians!

Mission:
Create a community wide culture that supports pedestrians through physical improvements, policies and pedestrian programs by increasing the pedestrian system network while simultaneously reducing the rate of pedestrian crashes.
Evaluation: Understanding Pedestrian Crashes

Of all the fatalities occurring on Metro roadways, 23% are pedestrian fatalities. That is why Louisville has conducted a 5-year pedestrian crash analysis to identify trends, high risk populations and high crash locations to target efforts to reduce pedestrian injuries and fatalities.
Evaluation: Move Louisville

The top two priorities identified in the plan are fixing and maintaining the existing infrastructure and reducing the number of miles that Louisvillians drive by providing and improving mobility options.

“If we fix our existing streets and sidewalks, embrace premium transit, and provide more complete streets with improved connectivity, we can create a safer, healthier and more livable city, and that will help us grow jobs,” said Fischer. “This investment in big, critical, long-term projects will strategically align us to support a thriving 21st Century city.”
Evaluation:
Move Louisville Bike/Pedestrian

- Sidewalk Connectivity
- Central Bicycle Network
- Louisville Loop
Evaluation:
Midblock Crosswalk Inventory

Inventory of 189 uncontrolled crosswalk locations

Prioritize locations for enhancements:
- Higher Speed Limit
- Number of Lanes
Education:
Look Alive Louisville
Enforcement: Pedestrian “Decoy” Operations
Engineering: Traffic Signals
Engineering: Sidewalk Gaps
Engineering:
Sidewalk Repairs
