This week, I had the honor of being one of 42 students selected from around the United States to attend the [Lifesavers National Conference on Highway Safety Priorities](#) on a scholarship provided by the [National Highway Traffic Safety Administration NHTSA's Traffic Safety Scholars \(TSS\)](#) Program. The Lifesavers Conference is the nation's biggest gathering of highway safety professionals. The conference was held in Chicago, Illinois, this year.

Throughout this conference, I learned about a range of programs and efforts being undertaken in the United States to achieve zero fatalities on our roadways.

I was especially inspired by the [National Transportation Safety Board Chair Jennifer Homendy's](#) moving statement, in which she underscored that the only acceptable number of deaths on our roadways should be zero, and I couldn't agree more.

While at the conference, I had the opportunity to network with some of the nation's top highway safety professionals and experts. Additionally, I took use of this opportunity to explore the beautiful Windy City (Chicago) and paid visits to Millennium Park and the Art Institute of Chicago.

The Lifesavers Conference will be hosted in Seattle, Washington, in the next year. If you are a student interested in transportation safety, I strongly recommend the TSS program!

I am honored to be named as Lifesavers Traffic Safety Scholar for the third time. Attending the Lifesavers National Conference on Highway Safety Priorities was a great experience, as I expected.

What a wonderful group of people doing fantastic work to enhance transportation safety.

I believe all the applause we received as Lifesavers scholars, and the inspiring speech we heard from Honorable Chair Homendy, motivates us to "fight like hell" for zero fatalities on our road!

If you are passionate about improving traffic safety, you can apply for the next year's Traffic Safety scholar at <https://lnkd.in/e38uqKKU>.

Special thanks to Mary Lofgren, Tara Casanova-Powel, Caroline Cash, [#lifesavers2022](#), [#nhtsa](#), [#ntsb](#) for their kind support.

I am honored to represent Michigan State University at the Lifesavers National Conference on Highway Safety Priorities as a Traffic Safety Scholar.

This conference provides the opportunity to meet fellow scholars, practitioners, academicians, and safety professionals.

I am grateful to Lifesaver's team for selecting me as a scholar. I would like to thank [Nanda Srinivasan](#) for answering my questions on crash trend and distracted driving. Lastly, I would like to thank Peter Savolainen and [Hisham Jashami, Ph.D., RSP1](#) for their guidance and support.

**#Lifesavers2022** We've had a wonderful time attending lifesavers conference. This is my second time attending the conference as **#trafficsafetyscholar**. Meeting up with old and new friends, and feeling inspired! I attended very informative sessions on Learning and adopting the **#SafeSystemApproach** in local state or community. Learned from real world examples and how road safety investments have been made in their states and communities, and how we can take their experience and use it in my field. Thanks to **#lifesavers2022**, many thanks to **Tara Casanova-Powell** and Mary Lofgren for your help and coordinate! See you in Seattle next year!

It was a great honor for me to attend the Lifesavers Conference [#Lifesavers2022](#) as a Traffic Safety Scholar. I had a great experience attending the workshop sessions, which inspired me to research in the traffic safety using a systems approach. Achieving Vision Zero requires the joint efforts from the academy, law enforcements and industry. As one of the researchers, I will be dedicating my career to prevent traffic death.

Thank you [Tara Casanova-Powell](#) and Mary Lofgren for organizing the [#lifesaverstss](#) and special thanks to CTOPS and [Alabama Transportation Institute](#) at the University of Alabama for their help and support. Hope I could contribute the conference as a presenter in the following meeting in Seattle.

I am honored to be selected as one of the Traffic Safety Scholars of 2022 among researchers from various disciplines across the nation.

I had the opportunity to attend the Lifesavers Conference, the world's largest gathering of leaders and advocates in traffic safety, in Chicago last week. It was a great experience to listen to the various challenges faced by traffic safety professionals and first responders. I realize understanding their perspectives can help me make small contributions within my role to help them improve traffic safety solutions. Together, we can all reduce the number of crashes and strive towards Vision Zero. [#lifesavers2022](#) [#visionzero](#)

My first ever **Lifesavers National Conference on Highway Safety Priorities** and it was more than I ever thought it would be. I gained a wealth of knowledge, and I connected with some brilliant people. I even shed a couple of tears. I can't wait for the next conference being held in Seattle Washington for 2023!!!

SN: To apply for next year's conference visit: <https://lnkd.in/dFetxT86> Lifesavers Traffic Safety Scholars scholarship 📄

There are no words that I can say that can truly express how I feel. My actions will speak louder than any words I can find.

Congratulations 🎉 to all every single lifesaver at this conference.

May we continue on this journey together and as the Honorable Jennifer Homendy said, "Let's fight like hell" to keep everyone safe from traffic violence!!! **#safetyfirst #visionzero #TextingIsRiskyBusiness**

Great experience of attending **Lifesavers National Conference on Highway Safety Priorities 2022** as a returning traffic safety scholar. This year was amazing because we returned to in person. The workshops and planneries had great takeaways like always. I was fortunate enough to connect with many people who really made an impact in road safety.

Thanks to the organizing committee for the whole hearted effort. Special thanks to **Tara Casanova-Powell** for taking care of the traffic safety scholars throughout the conference.

Loved the atmosphere in Chicago and looking forward to meet at Seattle 2023.

I had the chance to participate in 2022 Lifesavers National Conference on Highways Safety Priorities as a scholar. Every year, Lifesavers brings together the experts from academia, law enforcement departments, federal organizations and any one who is interested in improving the safety of our roads, transportation systems and community. Lifesavers conference covers a variety of topics such as traffic management, pedestrian and bicyclist safety, kids safety, new regulations and laws, autonomous vehicles safety, etc. I like to thank the Lifesavers organizers who provide me the opportunity of learning new things and updating my knowledge in my research field. I highly recommend this conference to all engineers in the field of transportation safety. [#lifesavers2022](#)

Feeling honored to be selected as a traffic safety scholar in the 40th Lifesavers Conference on Highway Safety Priorities. This is my first time attending this conference, and I have learned a lot from the excellent presentations and workshops from highway safety experts addressing the current traffic safety topics and research trends. It's a wonderful experience to speak with fellow attendees, researchers, and scholars who are working hard for saving lives on the road. Thanks to all the meeting organizers and volunteers for making all efforts.

Again, thank you [#lifesavers2022](#) for this great opportunity, and looking forward to attend the next conference in Seattle, Washington.

It was a great honor and joy to attend the Lifesavers Conference at Chicago as a Traffic Safety Scholar, and to reacquaint traffic safety from a policy maker, law enforcement, and most importantly road user perspective. As a transportation human factors researcher, this conference made me more aware of the weight and urgency of my current work, to improve the interaction between AVs and their human drivers.

I can feel the sincere hope and desire of a safer road from everyone's eyes, organizers, presenters, exhibitors. Because we all know that, as Jennifer Homendy mentioned during her inspiring speech, people are counting on us, to fight and protect OUR families. And the only acceptable number for safety is ZERO. Thank you [Nanda Srinivasan](#) for answering my questions regarding current NHTSA policies on AV driver monitoring, and [Pnina Gershon](#) for your presentation on driver visual attention shift during NDRTs. I really appreciate all the organizers, sponsors and attendees for making this conference such a great event for all lifesavers. [#lifesavers2022](#)

...

Last year, I applied to the Traffic Safety Scholars program, which provides college students the opportunity to attend the Lifesavers Conference, the largest gathering of traffic safety professionals in the U.S. Alhamdulillah, I was among the 43 students selected.

The program's goals are to showcase the diversity of opportunities in traffic safety and encourage students, regardless of discipline, to pursue a career in a dynamic field that draws from a variety of disciplines from engineering, education and enforcement to communications, business, marketing, medicine, public health, political science, counseling, and more.

As a researcher, we are used to scouring through research literature and analyzing data. Sometimes, there is a disconnect between what is modeled in statistical software and its impact on the ground. The Lifesavers Conference is one of those events that you see a merge between the two, the studies conducted, on the ground application, and the people behind implementations of countermeasures and programs.

LifeSavers 2022 was held in person at the Hyatt Regency in Chicago, Illinois. There were a total of three plenary sessions and 70 workshops featuring leading experts in the fields of distracted and impaired driving; child passenger, pedestrian, bicycle, motorcycle, teen, and aging driver safety; occupant protection; vehicle technology; law enforcement and criminal justice; public health, commercial motor vehicles; roadway design; and more.

Each workshop provides attendees with the platform to ask experts, share their experience, and even develop networking opportunities between various agencies. The conference was like a one-stop center for finding the right resources in the journey to improve road safety towards Vision Zero. The last conference I attended, which housed road safety practitioners and advocates, was in 2008, the International Safety Communities Conference. So LifeSavers was a renewed experience that I enjoyed and appreciated thoroughly.

Next year's Lifesavers, 2023, will be in Seattle, Washington. I would encourage students to take this opportunity to apply for the Traffic Safety Scholars Program and immerse themselves in this experience.

I was greatly honored to receive the 2022 Traffic Safety Scholar Award and attend the 40th Lifesavers Conference on Highway Safety Priorities. It was an amazing opportunity to learn from experts in the traffic safety field from a variety of backgrounds, such as engineering, law enforcement, and research. The conference featured dozens of workshops on pressing issues in highway safety and the strides being made to achieve our goal of zero roadway fatalities. Lifesavers was also an excellent opportunity for networking with researchers and professionals who are just as passionate as I am about traffic safety.

Sincere thanks to Mary Lofgren and Tara Casanova-Powell for all of the work they did in organizing the conference and the Traffic Safety Scholar program! I had an amazing time and I learned so much!

I can't wait for Lifesavers 2023! See you in Seattle!

It is an honor to share that I have attended the 2022 Lifesavers National Conference on Highway Safety Priorities held in the city of Chicago (March 12-15) as a Traffic Safety Scholar and a first-time attendee. I was named as one of the forty-two Traffic Safety Scholars, selected from a highly competitive application process around the US.

#Lifesavers2022 has positively blown me away. It easily became one of the most influential and educational conferences I have ever attended. It felt great to connect with traffic safety professionals, including researchers, highway safety personnel, first responders, designers, engineers, planners, and many more, all unanimously supporting the #visionzero movement. I fully exploited the conference and polished my understanding of the "Safe Systems Approach" in the transportation safety realm. I commit to adhere to the Safe Systems principles while I continue my safety research. I also thoroughly enjoyed the Lifesavers "first" bike tour around the beautiful city of Chicago while learning more about the operation, management, and safety of the biking infrastructure.

Finally, I would like to express my sincerest gratitude to the organizer and program coordinators for their relentless work in making this conference a huge success and providing me the opportunity to participate as one of the Safety Scholars. I also like to thank my supervisor, Dr. Chris Cherry, for his support when I represent the University of Tennessee Knoxville in the arena of Lifesavers versus Traffic crashes.

#lifesavers2022 #visionzero #safe\_systems\_approach

It was a great experience attending the **Lifesavers National Conference on Highway Safety Priorities 2022** in the **#windycity #chicago**, IL. I am privileged and grateful to be one of the 42 Traffic Safety Scholars selected across the **#nation**. Thank you to the organizers for planning and organizing very informative workshops and motivating plenary sessions. Special thanks to **Tara Casanova-Powell**, **Marry Lofgren**, and my advisor Dr. **Mohammad Jalayer** for their extensive support.

Zero is the only number. Let's achieve it! **#visionzero**

It was an honor to attend the 2022 **Lifesavers National Conference on Highway Safety Priorities** in Chicago with the generous support of the Traffic Safety Scholars program. I was privileged to network with transdisciplinary traffic safety professionals and students from across the United States who share similar interests in implementing the Safe System approach. I look forward to applying what I learned within my public health, prehospital care, research, and education roles. **#WeAreLifesavers!**

I had the opportunity to attend the Lifesavers National Conference earlier this month as part of the Traffic Safety Scholars Program. It was such a great opportunity to learn about the amazing work this community is doing to improve safety on our roadways and I am very grateful for the experience! It's so inspirational to be surrounded by wonderful people all striving for the same goal! #lifesavers2022 #lifesavers #LifesaversTSS

### Jiayun Shen's Post

Jiayun Shen

PhD student in the area of disaster and transportation at Clemson University, EIT  
2d

Two weeks ago, I attended the Lifesaver conference for the third time! It was a great experience learning about human factors and advancing my knowledge and understanding of transportation and traffic safety.

Presentations on driving behavior were on point. It provided me with much reflection on my driving behavior. The public is afraid of flight crashes because of uncertainty, yet the everyday risk of our driving behavior is getting overlooked.

I would recommend anyone interested in pursuing a career in traffic safety or trying to figure out the gap between research and practitioners to apply for next year's Traffic Safety Scholar. Thanks for the restless work of Tara and Mary for putting up the cohort together!

A plug-in: Clemson now offers a Master of Transportation Safety and Administration degree!

Current MTSA students in [Clemson University Graduate School](#) , [Matthew D. Simmons](#) and [Bridgette Watson](#) have been named 2022 Lifesavers Traffic Safety Scholars and will attend the [Lifesavers National Conference on Highway Safety Priorities](#), March 12-15. They were selected through a highly competitive application process. The conference showcases the latest research, evidence-based strategies, proven countermeasures, and promising new approaches for addressing the nation's most pressing traffic safety problems.

This is the seventh year of the Traffic Safety Scholars program, which provides college students the opportunity to attend the Lifesavers Conference, the largest gathering of traffic safety professionals in the U.S. The program's goals are to showcase the diversity of opportunities in traffic safety and encourage students, regardless of discipline, to pursue a career in a dynamic field that draws from a variety of disciplines from engineering, education and enforcement to communications, business, marketing, medicine, public health, political science, counseling, and more.

Congratulations, Bridgette and Matthew!

To the many great folks that asked me about job opportunities at FMCSA during the Lifesavers2022 Conference, there are currently 11 active announcements with dozens of openings on USA Jobs. Simply type "FMCSA" in the Keywords Search at [usajobs.gov](https://usajobs.gov) to see all available positions.

Two of the more unique opportunities are to become a GS-12 Safety Investigator through the Pathways program (for individuals that graduated within the last 2 years or 6 years for veterans) or you can start as a GS-7 or GS-9 and work your way up to the full performance level! It is rare to see the position posted as a 3-month open continuous announcement (closing 5/30/2022) with 35 available locations across the U.S. Also note, the Enforcement Support Clerk entry-level position (GS-4 to GS-5) is open from 3/16/2022 to 3/25/2022 in Baltimore, MD.

Please see below:

-PATHWAYS RECENT GRADUATE- Motor Carrier Safety Specialist - Safety Investigator: [https://lnkd.in/d\\_xDdWVr](https://lnkd.in/d_xDdWVr)

-Motor Carrier Safety Specialist (Safety Investigator) (Open to U.S. Citizens and Federal Employees): [https://lnkd.in/dAj5\\_P6](https://lnkd.in/dAj5_P6)

-Enforcement Support Clerk (Open to both U.S. Citizens and Federal Employees): <https://lnkd.in/dEu5fXT2>

#Lifesavers2022 It is such a great experience attending lifesavers conference 2022 as one of the #trafficsafetyscholar in the wonderful city of Chicago. Here, I attended many sessions, met and learned from passionate speakers and safety professionals. As mentioned several times during the conference, the final goal for traffic safety is #zerodeath. Way to go for us young students and professionals to contribute more to traffic safety field using our knowledge. Really appreciate the support from #lifesavers 2022, Center for transportation operations, planning and safety (CTOPS) and Alabama Transportation Institute. In addition, thanks to Tara Casanova-Powell and @Mary Lofgren for coordination and help!

I was a little delay of my social media posting, I had a great experience at 2022 Lifesavers National Conference on Highway Safety Priorities, March 12-15, in Chicago, as one of 43 Lifesavers Traffic Safety Scholar (TSS) to receive \$1,000 travel scholarship to cover the cost for this trip. The conference offers great information through workshops, exhibitions, and speeches. I took a lot of notes and a lot of pictures from the workshops. The workshops are very helpful that I wish I can attend each of them, but I have to flip coin to decide which one to attend because of time conflict. A few more picture showing what I gain from the conference.

#lifesavers2022

For those of you who are a student and have a great passion to improve traffic safety, you can apply Traffic Safety Scholar next year at <https://lnkd.in/e38uqKKU>

The 2023 application site will open in September 2022.

I am honored to be named as 2022 Lifesavers Traffic Safety Scholar (TSS) and attended the Lifesavers National Conference on Highway Safety Priorities, March 12-15, in Chicago. I learned so much information about latest research, evidence-based best practices, free secondary data sources of highway safety issues from the leading experts. This conference helped me understand how to associate our research with real-world practice (engineering, education, enforcement, and emergency medical services) to reduce traffic crashes. This three-day conference saved me months of searching materials to understand the same content.
